EDUCATION

The LNM Institute of Technology

Bachelor of Technology

2025-2029

SKILLS

- Languages: Python, C, HTML
- Tools: Linux, Git
- Concepts: DSA, Embedded Systems, IoT

PERSONAL STATEMENT

B.Tech student with a strong interest in software development, artificial intelligence, and embedded systems. Passionate about building real-world projects, learning new technologies, and solving practical problems through innovation and technology.

PROJECTS

Desktop Companion

Developing an ESP32-S3 based Desktop Companion with a touch display and interactive interface. Designed for real-time interaction and future AI-powered PC integration.

AI CHATBOT

Developed an AI-powered chatbot using Python that processes user queries and generates intelligent conversational responses. Implemented a modular architecture to improve scalability, functionality, and overall user interaction.
